Meet the Speakers

Bruce Huber, Associate Professor of Law, J.D., Ph.D (Political Science), University of California at Berkeley

Bruce Huber has taught in the University of Notre Dame Law School for three years. His areas of expertise include Energy Law, Environmental Law, and Property Law. Previously he taught at Dartmouth College in the Department of Government and as a graduate instructor at University of California, Berkeley, in the Department of Political Science. He also practiced law and worked as a Presbyterian college minister. This semester, Professor Huber has joined the University of Notre Dame London Global Gateway as a visiting faculty member and teaches Energy Law in the London Law Center.

Is Fracking the Answer? The Law and Politics of Energy Today

Not ten years ago, the United States was facing a troubling long-term energy forecast: experts predicted rising fuel costs, diminishing supplies, and reliance on foreign sources for decades to come. Now, it is widely known that America sits atop vast shale reserves that could meet much of the nation's energy demand for a century or more. Yet America's energy future is far from settled - and not simply because fracking remains such a potent source of controversy. Other legal and political battles, less recognized but just as critical, are rapidly approaching. Learn about the issues that will shape the evolution of the energy sector in the United States in the coming years.

Sign up to Fischer Hall Open House this week via your email invitation!

Notre Dame London t-shirts (£10) and sweatshirts (£20) will be available to purchase on the day - cash only.
